PROJECT

Temptation(Gaming Website)

HTML/CSS , JAVA SCRIPT, PHP, SQL

- This is a gaming website which promote a video game , create an online space that unites gamers or share industry news.
- A gaming website is by far the most effective way to present your game to your target audience. You might be able to reach more people by blasting social media ads.
- To create this website **HTML CSS and JAVA SCRIPT is used as front-end and PHP and MYSQL used as back-end**
- The tool used for creating this website is **visual studio , Xampp Control**

Bus Management System

- The bus ticket reservation system is currently maintaining the project Transport company's process manually which is very time consuming process
- It deals with the transport industry's ticket booking and transport maintenance , so it becomes a very tedious job for the ticket booking transporter to look after these particular to complete the task at the right time.
- used **VB 6.0** the Language reference to ADO database handling from creating Web browser to dragging and dropping data across application from email application to multimedia players from creating ActiveX controls and ActiveX Documents to setup program
